

Speaker Profiles

Pursuing Sound Governance in Banking

Breakfast Briefing: 22nd July 2010, British Bankers Association, London

Simon Hills, British Bankers Association

Simon is the Executive Director of the Prudential Capital and Risk Team at the British Bankers Association.

He leads the BBA team working on reforms to international regulatory architecture and Basel 2 resulting from the recent financial turmoil and their implementation in Europe via the Capital Requirements Directive (CRD) and the FSA's prudential sourcebook.

He is chair of the International Banking Federation's Basel working party and a member of the Court of the Worshipful Company of International Bankers.

The British Bankers Association is the leading association for the UK banking and financial services sector, speaking for 223 banking members from 60 countries on the full range of UK or international banking issues and engaging with 37 associated professional firms.

Robin Saunders, Nexus Technology

Robin is the Managing Director of Nexus Technology Ltd with forty years experience within the IT industry.

Robin developed his career at Mars Plc, becoming a Systems Manager and later European Personal Computing Manager. On leaving Mars he set up an IBM System Centre, which developed into a software consultancy and solution provider. High profile front line risk management solutions were developed for organisations, such as British Aerospace and Zurich Financial Services. Today Robin focuses on the non financial aspects of

corporate governance and compliance issues.

Nexus Technology Ltd. is a leading software supplier specialising in the areas of compliance, corporate governance and risk management. Established in 1992, Nexus Technology has a successful record of developing custom-designed applications and marketing its range of packaged software. The growth of Nexus Technology reflects an extensive knowledge and understanding of the essential contribution that IT plays in successful businesses and the company's ability to help its customers get business value from their software implementations.
