

# Kofax Capture 8.0

Capability	Description	Benefit
<b>Kofax Capture Enterprise</b>		
<b>Disaster Recovery</b>	Central site automatic fail-over to alternate central site(s); 100% retention of remote batches in progress if a central site fails	Reliability; business continuity; data integrity; insulation from central site disaster; transparency
<b>Load Balancing</b>	Dynamic, static, or programmatic load balancing options for remote site image and data uploads	Minimize operational costs
<b>SNMP Monitoring</b>	Monitor and manage Kofax Capture status using SNMP monitoring tools or included viewer	Reliability
<b>IBM DB2 Support</b>	IBM DB2 can be used for all Kofax Capture databases	Leverage industry standards; alignment with staff knowledge; utilize your company's preferred database
<b>Oracle Database Support</b>	Oracle Database can be used for all Kofax Capture databases	Leverage industry standards; alignment with staff knowledge; utilize your company's preferred database
<b>Kofax Capture &amp; Kofax Capture Enterprise</b>		
<b>Staging/Setup</b>	Ability to migrate configuration data (batch classes, user profiles, remote site profiles) between different Kofax Capture systems (i.e. development, staging, and production)	Minimize configuration and deployment costs
<b>Scanner Management</b>	Share and manage scanner profiles among multiple Kofax Capture workstations; easily add scanners within Kofax Capture	Minimize configuration and deployment costs
<b>Copy/Paste</b>	Copy and reuse objects such as batch classes, folder classes, document classes, form types, and zones.	Minimize configuration and deployment costs
<b>Multiple Workflow Agents</b>	Support for multiple workflow agents per batch class	Minimize configuration and deployment costs; reduced development and testing time

# Kofax Capture 8.0

Capability	Description	Benefit
<b>.NET Scripting</b>	Robust scripting editor with integrated debugging tools, improved user interface capabilities, and easy access to program libraries	Minimize configuration and deployment costs; alignment with staff knowledge
<b>Automatic Batch Naming</b>	Ability to configure your Kofax Capture batch names using criteria you define	Minimize operational costs; easily locate batches in progress
<b>Rubber Band OCR</b>	Runtime recognition of selected typewritten text (OCR), handwritten text (ICR), or bar codes	Minimize operational costs
<b>User/Group Routing</b>	Route batches to specific individuals and/or groups for specialized processing	Minimize operational costs; improved productivity and/or accuracy; improve document security
<b>Panel Lock/Reset</b>	Ability to lock docked panels and toolbars or reset if incorrect	Minimize operational costs; less user errors
<b>Enable/Disable Menu and Toolbar buttons</b>	Ability to enable/disable menu items and toolbar buttons by user and/or group	Minimize operational costs; reduce user errors; block forbidden operations (compliance)
<b>PDF/A Support</b>	Release images in a PDF archival file format	Leverage industry standards; compliance
<b>Security Enhancements</b>	Reduced client permissions; client certificate support; basic/integrated authentication support; simplified configuration of Web Server; elimination of WebDAV requirement	Leverage industry standards; comply with security policies; better authentication options
<b>Microsoft Vista Support</b>	Support for the latest Microsoft operating system	Leverage industry standards; improved security
<b>Release Script Enhancements</b>	Faster database release script; folder support and file name control for the text release script	Improved throughput; easily locate released documents
<b>Remote Site Release</b>	Ability to release images and data at a remote site	Storage location options
