## Achieving Compliance through good governance & best practice

Breakfast Briefing: 15<sup>th</sup> October 2009, British Bankers Association, London

### Kai Vaksdal, Nexus Technology

Certified in Compliance by the International Compliance Association, Kai has worked in the banking, insurance and finance sector for over 15 years.

His extensive experience in the fields of document management, compliance and policy management has led him to work with many of the UK's top companies. His current role is to focus directors' attention on improving Governance, Best Practice and Compliance through better policy management and operating practices.

Nexus Technology Ltd. is a leading software supplier specialising in the areas of compliance, corporate governance and risk management. Established in 1992, Nexus Technology has a successful record of developing custom-designed applications and marketing its range of packaged software. The growth of Nexus Technology reflects an extensive knowledge and understanding of the essential contribution that IT plays in successful businesses and the company's ability to help its customers get business value from their software implementations

### Josef Elliott, Oyster IMS

Josef Elliott is Managing Director of Oyster IMS. The main thrust of his consulting work is around Information Strategy and Electronic Document and Records Management (ED)

Before founding Oyster IMS in 2003, Josef ran the consulting division of a global Business Process Outsource (BPO) organisation and before that was a founding partner in Elliott Slone, the UK's first litigation support bureau building discovery databases for law firms and their clients.

Oyster IMS is a young, agile technology business specialising in products and services to help organisations efficiently and effectively manage their information and in doing so, to inform and support their broader Governance, Risk and Compliance objectives. Oyster IMS have become a leading player in the information management industry through offering high quality advice, providing detailed targeted analysis and solutions design, and delivering world-class implementations of market leading information management systems.
